

# WEST VIRGINIA DRUG CONTROL UPDATE

This report reflects significant trends, data, and major issues relating to drugs in the State of West Virginia.

#### **West Virginia At-a-Glance:**

- In 2007-2008, West Virginia was one of the top ten states for rates in several drug-use categories among young adults age 18-25: past-year use of cocaine; past-month use of illicit drugs other than marijuana; and illicit drug dependence. *Source:* National Survey on Drug Use and Health (NSDUH), 2007-2008.
- Approximately 7 percent of West Virginia residents reported past-month illicit drug use; the national average was 8 percent.
- The rate of drug-induced deaths in West Virginia is higher than the national average. McDowell County in West Virginia has the 5<sup>th</sup> highest rate of drug poisoning deaths in the country, at 38.3 deaths per 100,000 population.

# **Drug Use Trends in West Virginia**

**Drug Use in West Virginia:** The National Survey on Drug Use and Health (NSDUH) provides national and state-level data on the use of tobacco, alcohol, illicit drugs (including non-medical use of prescription drugs), and mental health in the United States. In the most recent Survey, 6.79 percent of West Virginia residents reported using illicit drugs in the past month. The national average was 8.02 percent. Additionally, 3.78 percent of West Virginia residents reported using an illicit drug other than marijuana in the past month (the national average was 3.58 percent).

**Drug-Induced Deaths:** As a direct consequence of drug use, 405 persons died in West Virginia in 2007. This is compared to the number of persons in West Virginia who died from motor vehicle accidents (429) and firearms (267) in the same year. West Virginia drug-induced deaths (22.4 per 100,000 population) exceeded the national rate (12.7 per 100,000).

# **Substance Abuse Treatment Admissions Data**

#### West Virginia primary treatment

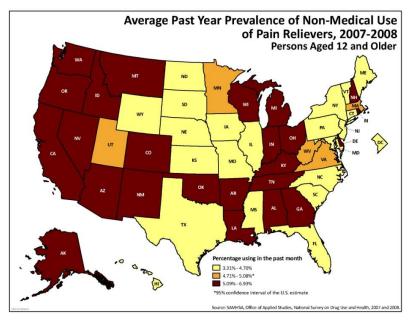

**admissions:** The graph at right depicts substance abuse primary treatment admissions in West Virginia in 2009. The data show that opiates, including prescription drugs, are the most commonly cited drugs among primary drug treatment admissions in the state. *Source*: Treatment Episode Data Set, Substance Abuse and Mental Health Services Administration: http://oas.samhsa.gov/dasis.htm

#### **Prescription Drug Abuse**

# ONDCP's Efforts to Combat Prescription Drug Abuse

Prescription drug abuse is the fastest-growing drug problem in the Nation. The Administration's Prescription Drug Abuse Prevention Plan, entitled, "Epidemic: Responding to America's Prescription Drug Abuse Crisis," provides a national framework for reducing prescription drug diversion and abuse by supporting the expansion of state-based prescription drug monitoring programs; recommending secure, more convenient, and environmentally responsible disposal methods to remove expired, unused, or unneeded medications from the home; supporting education for

patients and healthcare providers; and reducing the prevalence of pill mills and doctor shopping through enforcement efforts.

#### **State-Level Action: Prescription Drug Monitoring Programs (PDMPs)**

PDMPs serve a number of functions, including assisting in patient care, providing early warning signs of drug epidemics, and detecting drug diversion and insurance fraud. Thirty-five states have operational PDMP programs established by state legislation and funded by a combination of state and Federal funds. An additional 13 states have a prescription drug monitoring program authorized, but not yet operational. Adequate resourcing, increasing the number of states with operational PDMPs, and development of state-to-state information-sharing systems would significantly help reduce prescription drug diversion and abuse.

West Virginia's **Prescription Drug Monitoring Program** was established in 1995 by the state Board of Pharmacy for the monitoring of Schedule II-IV Controlled Substances. Data collection occurs once per week and collects an average of 3.3 prescriptions annually. West Virginia received grants to fund its PDMP under the Harold Rogers Prescription Drug Monitoring Program Grants, administered by the Department of Justice Bureau of Justice Assistance, in 2002 and 2004.

#### State-Level Action: Drug Take-Back Programs

A comprehensive plan to address prescription drug abuse must include proper disposal of unused, unneeded, or expired medications. Providing individuals with a secure and convenient way to dispose of controlled substances will help prevent diversion and abuse of these substances and demonstrate sound environmental stewardship. Federal rulemaking is underway and will further enhance the viability and scope of state and community take-back programs. In the meantime, states are encouraged to work with the DEA to conduct additional take-back events and educate the public about safe and effective drug return and disposal.

#### **Drugged Driving**

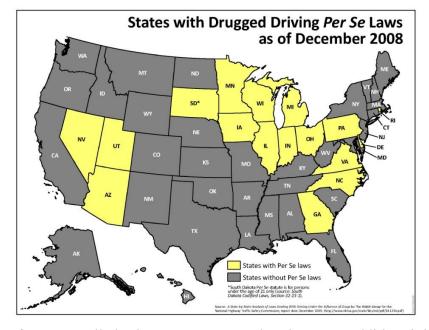

#### **ONDCP** Action on Drugged Driving

In 2007, the National Highway Traffic Safety Administration (NHTSA) found that one in eight weekend, nighttime drivers tested positive for illicit drugs. According to recent Fatal Accident Reporting System (FARS) data, one in three motor vehicle fatalities (33 percent) with known drug test results tested positive for drugs in 2009. Recognizing this growing problem, ONDCP is working to raise awareness of the dangers of drugged driving, provide increased training to law enforcement in identifying drugged drivers, and encourage states to consider *Per Se* laws to facilitate effective enforcement and prosecution of those who drive with drugs in their systems.

# State-Level Action: Enacting Per Se Standards for Impairment

Although all 50 states have laws against drugged driving, law enforcement often lacks adequate tools to enforce and prosecute drugged driving. ONDCP encourages states to develop and implement *Per Se* standards for impairment that make it illegal to drive a vehicle after taking illegal drugs. This is the same standard used successfully for 12 million commercial drivers in the United States over the past two decades. *Per Se* standards have been adopted in 17 states.

# West Virginia does not currently have a *Per Se* standard, but West Virginia State law (*§17C-5-2*) prohibits driving under the

influence by any person "under the influence of any controlled substance" or "any other drug." In addition, it is a misdemeanor to both drive a vehicle or knowingly permit your own vehicle to be driven by "any person who is a habitual user of narcotic drugs or amphetamine or any derivative thereof." Legal entitlement or prescription to use a controlled substance is not a defense for driving under the influence.

## **ONDCP Support for Community-Based Prevention**

#### **National Anti-Drug Media Campaign**

ONDCP's National Youth Anti-Drug Media Campaign provides consistent and credible messages (including in Native American and Alaska Native communities) to young people about drug use and its consequences. *Above the Influence*, a major component of the Campaign, informs and inspires youth to reject illicit drugs and drinking via a mix of national and local advertising vehicles. The Campaign, in close partnership with local community-based, youth-serving organizations, also conducts teen-targeted *Above the Influence* activities to assist local groups with youth drug prevention work in their respective communities.

**The Drug Free Communities Program:** Recognizing that local problems require local solutions, Drug Free Communities (DFC) organizations mobilize communities to prevent youth drug use by creating local data-driven strategies to reduce drug use in the community. ONDCP works to foster the growth of new coalitions and support existing coalitions through the DFC grants. In FY 2011, the following West Virginia coalitions received grants from ONDCP:

- Brooke Hancock Drug Prevention Coalition (Weirton, WV)
- Cabell County Substance Abuse Prevention Partnership
- Creating Opportunities for Youth (Bluefield)
- Jackson County Anti-Drug Coalition

- Marshall County Anti-Drug Coalition
- Morgan County Partnership, Inc.
- Ohio County Substance Abuse Prevention
- Strong Through Our Plan(Gilbert, WV) Source: Office of National Drug Control Policy http://www.ondcp.gov/dfc/grantee\_map.html

## ONDCP High Intensity Drug Trafficking Area (HIDTA) County Info

The High Intensity Drug Trafficking Areas (HIDTA) program enhances and coordinates drug control efforts among local, state, and Federal law enforcement agencies. In designated HIDTA counties, the program provides agencies with coordination, equipment, technology, and additional resources to combat drug trafficking and its harmful consequences in critical regions of the United States.

### **HIDTA Counties in West Virginia:**

**Appalachia HIDTA:** Boone, Cabell, Kanawha, Lincoln, Logan, Mason, McDowell, Mercer, Mingo, Putnam and Wayne counties.

- The Appalachia HIDTA supports five multi-agency task forces in West Virginia whose mission is to dismantle and disrupt drug trafficking organizations operating in the designated HIDTA counties.
  - o *Huntington Violent Crimes/Drug Task Force:* focuses on major organizations that traffic in marijuana, cocaine, methamphetamine, heroin, and diverted pharmaceuticals.
  - Metropolitan Drug Enforcement Network Team: investigates family-based or loosely knit trafficking organization involved in marijuana cultivation, clandestine methamphetamine laboratories, and diversion of pharmaceuticals in southern West Virginia.
  - U.S. 119 Drug and Violent Crime Task Force: focuses on drug trafficking organizations, with specific emphasis on the four primary drugs affecting the region: cannabis, OxyContin, cocaine, and cocaine base.
  - West Virginia DEA HIDTA Task Force: focuses on locally based mid- to upper-level drug trafficking organizations with local, multi-state, or international operations.
  - West Virginia Eradication Initiative: focuses on reducing the availability of marijuana in the region and beyond.

#### Federal Grant Awards Available to Reduce Drug Use in the State of West Virginia

The Federal Government awards competitive grants to help states in their efforts to reduce drug use and its harmful consequences. In FY 2010, direct support was provided to state and local governments, schools, and law enforcement organizations in your state for this purpose. Some Federal grant programs are dedicated to reducing drug use and its harmful consequences while others can be used for reducing drug use or for other purposes. In FY 2010, your State received support under the grant programs shown below.

Federal Grant Awards	
	2010
Department of Education	
Safe and Drug-Free Schools and Communities_National Programs	2,339,601
Improving The Climate For Learning	2,339,601
Department of Health and Human Services	
Administration for Children and Families	3,072,235
Mentoring Children of Prisoners	206,227
Promoting Safe and Stable Families	2,866,008
Health Resources and Services Administration	698,735
Healthy Start Initiative	698,735
National Institutes of Health	878,707
Discovery and Applied Research for Technological Innovations to Improve Human Health	522,513
Drug Abuse and Addiction Research Programs	356,194
Substance Abuse and Mental Health Services Administration	14,370,431
Block Grants for Prevention and Treatment of Substance Abuse	8,740,456
Projects for Assistance in Transition from Homelessness (PATH)	300,000
Substance Abuse and Mental Health Services_Projects of Regional and National Significance	5,329,975
Department of Housing and Urban Development	
Assistant Secretary for Community Planning and Development	(158,168
Shelter Plus Care	(158,168
Department of Justice	
Office of Justice Programs	22,857,928
Community Capacity Development Office	157,000
Congressionally Recommended Awards	3,606,000
Criminal and Juvenile Justice and Mental Health Collaboration Program	200,000
Drug Court Discretionary Grant Program	350,000
Edward Byrne Memorial Justice Assistance Grant Program	2,998,238
Enforcing Underage Drinking Laws Program	356,400
Juvenile Accountability Block Grants	404,800
National Institute of Justice Research Evaluation and Development Project Grants	14,331,349
Recovery Act - Eward Byrne Memorial Justice Assistance Grant (JAG) Program	242,151
Residential Substance Abuse Treatment for State Prisoners	211,990
Executive Office of the President	
Substance Abuse and Mental Health Services Administration	1,000,000
Drug-Free Communities Support Program Grants	1,000,000
Grand Total	45,059,469

Note: Report as of 11/30/2010. FY 2009 includes additional grant awards under the Recovery Act. The Federal, State and Local Shares of Medicaid and the Federal Medicare Programs are not included above. Updated 6/7/2011.
